

The new, transportable coffee brewer, Café on the Spot, brings any kind of coffee and chocolate speciality directly to you without being connected to water or power.

### Café on the Spot

The Café on the Spot is just the right coffee brewer to choose when complete freedom of movement is a necessity and a permanently installed coffee brewer does not fulfil the requirements anymore, such as in conference rooms, exhibition halls, airports, hospitals, or residential homes to name a few. The unique combination of the coffee brewer and the trolley equipped with solid rubber wheels, making it easy to manoeuvre, gives you the possibility of serving any kind of coffee or chocolate beverage to your guests, customers or staff in seconds, right on the spot where they need it the most. Café on the Spot has a water capacity of 120 cups per refill. The trolley has room for two dish-washing trays for storage of cups and plates, etc. Both the coffee brewer and trolley are easy to operate and require only a minimum of cleaning. The Café on the Spot is made in stainless steel and of the Danish, classic design that characterizes all Scanomat coffee brewers.
